TechCellar revisits AIDE website (Introduces new platform and look)

From left to right: Mr. Albert Garcia, IT Specialist—TechCellar; Mr. Angelo Dela Pena, Project Manager—TechCellar; and Mr. Bob Gantuangco, Chief eBusiness Success Enabler of TechCellar

Starting July of this year the officials of TechCellar and AIDE have been in constant co-ordination to give AIDE's website a new look. Several platform and changes have been proposed and recommended to upgrade the current website and make it more user-friendly to all stakeholders like the students, module writers, visitors/viewers and Administrators.

It was only upon presentation to AIDE's President and CEO, Mr. Antonio O. Cojuangco and his final consent last September 2019 when the new website was considered final and approved. ***See Page 3***
